

## Downflo® Oval Dust Collectors

# Downflo® Oval

## A Family Of Over-Achievers

The high performance Downflo® Oval (DFO) family of over-achieving dust collectors provides up to 25 percent more filtration capacity than other same-sized cartridge collectors. Powered by patented Ultra-Web® nanofiber filtration technology, DFO delivers cleaner air, up to two times longer filter life, and greater cost savings.

The DFO advantage is found in the collector's patented design and components. The combination of a new cabinet design that greatly lowers cabinet velocities, patented Extra-Life™ cleaning technology, and Ultra-Web nanofiber filters allows more airflow through the collector without increasing the size of the footprint or damaging the filters.

A smaller collector helps lower the initial purchase price, reduces filter replacement costs and opens up valuable manufacturing floor space.

**25%**  
MORE  
CAPACITY

### DFO Offers:

- **Lower initial cost per cubic foot of air per minute (cfm)**
- **Higher efficiency - cleaner air**
- **Lower pressure drop - greater energy savings**
- **Fewer filter changeouts**
- **Reduced filter disposal cost**
- **Easy system set-up**
- **Less maintenance**
- **10-year warranty**

DFO 3-18

## Outperforms All Other Collectors

DFO collectors offer some strong benefits that distinguish them from all other collectors available in the market today.

- **Easy to use** Quick-release handles provide easy cover removal and faster filter access.
- **Powerful** DFO collectors provide 25 percent more capacity than same-sized dust collectors.
- **Compact** Smaller footprints for applications that require maximum cleaning efficiency in even smaller spaces.
- **Cost effective** The patented ExtraLife™ Filter Cleaning System averages up to 30 percent increase in pulse cleaning energy for unmatched cleaning ability.
- **Innovative** Unique oval-shaped Ultra-Web® cartridge filters provide the longest filter life and highest filtration efficiency — which lowers cost.

DFO 2-4

DFO 3-3

# Downflo® Oval

## Sizes & Operations

### Normal Operations For Models 1-1, 2-2 and 3-3

DFO 1-1

### DFO Models 1-1, 2-2 and 3-3

- Incorporate several exclusive and unique features
- Completely self-contained, "plug-and-play" type units
- Packaged with power pack, controls, silencer, damper, dust container and more
- Remarkably quiet operation
- Exceptionally compact design
- Easily movable through standard aisles and doorways

## Sizes & Operations

### Normal Operations For Models 2-4 Through 4-128

### DFO Models 2-4 to 4-128

- 23 standard model sizes
- Customized sizes available
- Many options and accessories
- Exceptionally compact design
- Highest energy savings

*Simply  
the Best  
Dust Collectors  
Available*

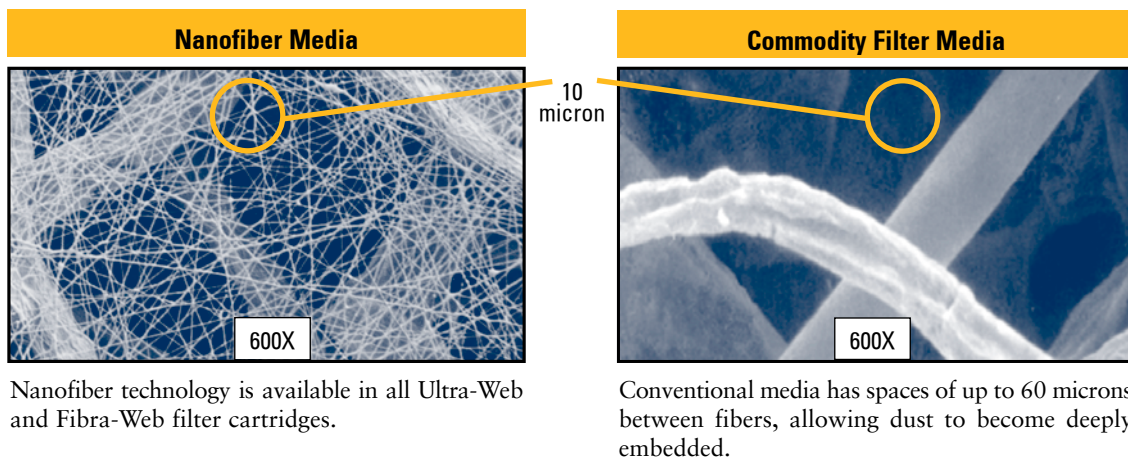

# Downflo® Oval

## DFO Technology Unfolds

*The Remarkable Story of DFO  
Begins with the Oval Cartridge Filter Itself*

**Ultra-Web Nanofiber Media** A dramatic departure from traditional circular-shaped cartridge filters, DFO's oval-shaped filters, in conjunction with our patented nanofiber filter media, trap more dust on the surface of the filter than conventional commodity types of filter media such as depth-loading cellulose, polyester or cellulose/polyester blend.

*The Innovation Continues with  
DFO's Shorter, Stiffer Filter Pleats*

**DFO Filter Media Pleats** Shorter and stiffer filter pleats help minimize dust entrapment and simplify filter cleaning. By reducing the height of the filter pleats from the standard 2 inches to 1.5 inches, the pleat wall is less likely to collapse or bend, which can encapsulate dust and prevent its expulsion.

# Downflo® Oval

5

## More Airflow, Less Filter Media

*Unique Oval Shape  
Contributes to Higher Airflow Capacity*

**High Performance Filters** The Downflo Oval filter design is a reflection of Donaldson Torit's commitment to technical research and development. Oval-shaped filters handle up to 25 percent more airflow without increasing velocities, which can cause filter abrasion. Sophisticated FLUENT® Airflow Modeling Software revealed that oval-shaped cartridge filters have fewer areas of high velocity, resulting in a lower potential for media abrasion and increased filter life.

*Airflow Breakthroughs Lead To  
A New Chapter In Filtration Performance*

**Sophisticated Modeling** Computer modeling for fluid dynamics, structural mechanics and acoustics puts DFO models 1-1, 2-2, and 3-3 in a technical class all their own. The illustration below (left) shows how FLUENT Flow Modeling Software enhanced the uniform air velocity distribution through model DFO 3-3. ANSYS® Structure Analysis Software shown below (right) demonstrates lowest stress levels and deflections for model DFO 3-3 under typical operating pressures.

## Better Filtration, Prolonged Filter Life

### *Technical Discoveries Improve Filtration Performance And Prolonged Filter Life*

**Convex Side Walls** A new cabinet design with convex side walls streamlines the airflow path and increases the cabinet's cross-sectional area. The convex side walls provide more space between filters, lower cabinet velocities and reduce the potential for media abrasion.

**Pulse Cleaning Technology** ExtraLife Filter Cleaning System uses proprietary, computer-modeled pulse cleaning technology to easily “pulse off” dust from the surface of the filter, improving filtration efficiency and prolonging filter life. The red lines in the illustration show the increased pressure at the front of the Downflo filter generated by the ExtraLife system. The blue line shows the pulse signature of a standard cartridge collector.

## Filter Changes and Discharge Maintenance

**Easy Maintenance** With the new design of the DFO's quick-release access handles, filter removal and maintenance is extremely fast with one simple movement of the clamp.

**Bag-In/Bag-Out Arrangements** Improve filter changeouts and hopper discharge maintenance, help minimize worker exposure to potentially harmful dusts, and reduce exposure of contaminants to the atmosphere.

- Porthole covers protect changeout bags and provide a clean appearance.
- Heavy-duty plastic bags hold filters and function as gloves during the changeout procedure.
- Filters are disposed of in a sealed bag.
- Bag-in/Bag-Out drum arrangement is safely held in place through drum latches and hose clamps.

## Operating Advantages & Conditions

DFO Models	1-1	2-2	3-3	2-4 through 4-128
Horse Power	1.5	3	5	**
Sound Level dB(A)*	68	68	70	**
External Static Pressure ("wg)	***	***	***	**
Housing Construction (gauge)	12	12	12	10 (collector) 7 (tubesheet)
Housing Rating (inches H <sub>2</sub> O)	-20	-20	-20	-20
Wind Load Rating (mph)	—	—	—	100
Seismic Rating (zone)	4	4	4	4
Compressed Air Required (psig)	60	60	60	2-4, 3-6: 60 2-8 and up: 90-100
Electrical Power	120 VAC,	120 VAC,	120 VAC,	120 VAC,
Valves/Controls	50/60 Hz	50/60 Hz	50/60 Hz	50/60 Hz

\* Sound measurements were taken in a hemianechoic chamber and under free field conditions and do not reflect the influences of actual operating environments. Standard sound pressure levels were taken at an operator position of 1.5 m high and 1 m from source.

\*\* Provided through Donaldson Torit fan program.

\*\*\* See system performance curves on page 9.

## Addressing Safety Concepts

**Donaldson Torit** manufactures or partners with experts to provide solutions for critical processes where harmful particulate must be controlled.

- Explosion Relief Panels (with or without weather domes)
- Suppression Systems
- Reinforced Housing Construction

## System Curves For DFO Models 1-1, 2-2 and 3-3

**Powerful Performance** Unlike other technologies that require upgrades for more demanding applications, each DFO 1-1, 2-2 and 3-3 footprint comes standard with a unique high performance power pack. The system performance graphs below show the fan performance with clean filters. The curve indicates available external static pressure to the unit.

**DFO 1-1 1.5HP 60Hz with 6 in. inlet duct (clean filter)**

**DFO 1-1 3HP 50Hz with 6 in. inlet duct (clean filter)**

**DFO 2-2 3HP 60Hz with 8 in. inlet duct (clean filters)**

**DFO 2-2 3HP 50Hz with 8 in. inlet duct (clean filters)**

**DFO 3-3 5HP 60Hz with 9 in. inlet duct (clean filters)**

**DFO 3-3 5HP 50Hz with 9 in. inlet duct (clean filters)**

\* The Minimum Efficiency Reporting Value (MERV) of this filter cartridge has been determined through independent laboratory testing using ASHRAE 52.2 (1999) test standards. The MERV rating was determined at a face velocity of 118 feet per minute and loading up to four inches water gauge. Actual efficiency of any filter cartridge will vary according to the specific application parameters. Dust concentration, airflow, particle characteristics, and pulse cleaning methods all affect filtration efficiency.

# Our Business is Improving Your Workplace Air Quality.

Since 1995, Environmental Solutions has been helping businesses, like yours, improve their workplace air quality. As an authorized service center for Donaldson Torit, we offer you a one-stop shop for equipment, service, engineering and installation of the industry's leading air pollution control systems.

Whether your company requires the removal of oil mist, welding fumes, machining or wood-working dust, graphite, or correction of any other type of air quality problem; we can expertly engineer and install a quality Donaldson Torit solution to meet your unique needs. No system is too big or too small.
